Kirkwood landmarks commission Application for Certificate of Appropriateness

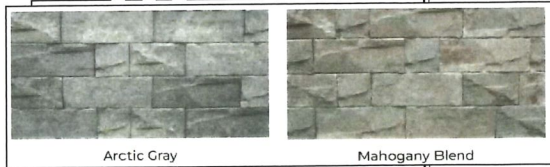

705 North Taylor Avenue

10/12/22

1. Replace Railing on back porch. Current railing is a sawn baluster Douglas fir railing. It has not held up and is now rotten. Plan is to replace it with the same Timbertech Premier railing and square balusters approved by this commission previously for the front porch and railing above the new screen porch. It will be built with standard 39 inch high by 4-inch posts and standard spacing.
2. Replace driveway. The blacktop driveway is failing. The location of the current entrance affords us little privacy and leaves the garage on display from the street view. The original driveway entrance was further west along Jewel Avenue. Until a recent replacement of a section of concrete, there was a curb cut in that location. Our plan is to move the driveway entrance back to that location. We plan to use exposed aggregate concrete with Iowa glacial aggregate (or Old Monroe if Iowa is not available). Because of the steep slope from the street to the yard, we will need to remove some soil for the approach. This soil will be used to fill in the old approach. If we were to contour the new entrance as was done on the old one, we would have to remove a considerable number of bushes and trees (Among the 22 trees, 80 shrubs, and countless perennials we have added over the last 22 years). To avoid this, we propose to build small retaining walls on each side of the driveway approach (as many neighbors have done). See drawings for details regarding the small wall. We will then place plants in the old approach that will replicate those removed from the new approach. The driveway square footage will be the same as the current driveway.
3. Replace patio and add walkways. The new porch covered the site of our old patio. We plan to replace this patio on the east side of the porch. We will also repair the walkway from the driveway to the front yard and add a walkway to the back door. This will be done with flagstone and a crushed stone base, allowing these surfaces to be permeable to water. There will be a small sitting wall on the patio as shown in the drawings. There is no way for visitors to safely access our front door when parking on Jewel Avenue (it is unsafe to park on Taylor Avenue). We plan to add a walkway from Jewel Avenue to the south side of the front porch, again using flagstone on a crushed stone base. See drawings for details.
