Helpful Hints for the City Map Tools

The Kirkwood City Base Map works best on Windows browsers. It also works in Safari and Firefox on Apple products (but typically not in Chrome or on the iPad). Users must have Adobe Flash Player, version 11.0 or higher, installed for the maps to work.

To zoom in to a specific area, click on the plus icon under the hand icon. Then draw a square or rectangle on the map, and it will zoom in to that area. To broaden this area, click on the minus icon and do the same.   To slide the map across the page, click on the hand icon first. Then click inside the map and move it with your mouse.
